Vault makes managing visitor information a breeze. The host has access to the information they need, making visitor management smooth and easy. Vault VMS Cloud is designed with simple and user friendly interface

Automatic Cancellation

Visitor Recognition

VAULT CLOUD ENTERPRISE INTEGRATED AI-TECH

CENTRAL MONITORING SYSTEM

Total Security Management with AI Detection

Vault VMS Cloud adopt new AI to meet the ever-changing security requirement such as flexibility, high security and capital-expenditure free. These are the benefits of hosting VAULT Enterprise software on Cloud.

Seamless Integration

Several third party systems are already integrated with integrated Technology, one way bidirectionally, such as Cloud System, CCTV System, Elevators, Human Resources, Building Automation, LPR, etc.

Synchronize Data

The more employees, freelancers and locations, the greater the need to have a watertight access control system in place. Updating access control system from anywhere gives you the agility to update or delete access rights immediately.

Total Scalability of LAN/WAN

Increments of one up to hundreds or thousands of IP Controllers, one by one, provide great flexibility to the system. From small to global companies with installations in every continent, VAULT Cloud Enterprise allows for unlimited scalability.
